- Water

## 2000 Land Use

The map is provided for general locational information. The features have been derived from various sources, each of which has its own scale and accuracy. The locations of all features are approximate. This map should not be used as a basis for purchasing property. Field survey delineations are required to verify the exact locations of wetlands and other map features. Aerial orthophotography from the Spring of 2000 was the primary data source for the Land Use Inventory.
